KEYNOTE & OPENING SESSION

WEDNESDAY, AUGUST 20TH, 2025, 8:00AM (ROOM 303A-B)

KEYNOTE:

“WORKER AND PUBLIC SAFETY – MAKING IT A CORE VALUE IN YOUR INDUSTRY, NOT A PROGRAM.”

by **David Biderman**, President, Biderman Consulting, LLC (VA)

Worker and public safety associated with water, energy, and waste operations need to be a core value for all employers. Reducing accidents and injuries helps improve your company's image, recruit and retain employees, and your bottom line. Eliminating these incidents takes continuous focus, management leadership, and changing unsafe behaviors by both employees and the public. A national safety expert will discuss how to make safety training memorable and accomplish these goals. Attendees will receive actionable tools they can use to reduce safety hazards and incidents at your workplace.

David Biderman has been a leader in the solid waste and recycling industry for more than 35 years. David is the President of Biderman Consulting, LLC, a boutique firm focusing on sustainability, safety, and advocacy. Biderman's clients include US and foreign companies (Europe, Latin America, Asia) in the solid waste industry or who sell goods/services to the North American solid waste industry, and local governments. David was the Executive Director of the Solid Waste Association of North America (SWANA) from 2015-2023, and helped substantially increase its membership, visibility, and leadership position in the U.S. concerning waste and recycling issues. He personally led projects in Belize and Colombia and spoke at events in Argentina and Brazil. He served on the U.S. Department of Commerce's Environmental Technologies Trade Advisory Committee (ETTAC) and represented the U.S. at International Solid Waste Association events. David joined SWANA in April 2015 after 18 years with the National Waste & Recycling Association, where he was General Counsel, Vice President of Government Affairs and Safety Director. He is a frequent expert witness, has testified before numerous federal, state, and local agencies and councils, is quoted frequently by national publications, and has spoken about environmental issues, policies, and trends at numerous domestic and international environmental conferences, including events in the United States, Canada, Asia, Latin America, and Europe.

SPECIAL ACCREDITED WATER COURSES (ENGLISH)

Aug. 20TH, 1-5 pm (4 hours)

“STRATEGIES FOR BETTER SEWER PIPELINE ASSET MANAGEMENT.”

(0.4 CEU credits & Certificate of Participation released by The University of Texas at Arlington – UTA).

To ensure the good condition of sewer assets, it is necessary to move toward an asset management approach, where taking care of the system’s maintenance and performance becomes a priority. This training explores the standard techniques for gathering information on wastewater pipelines, their strategic integration into asset management, and its use for smart decision-making strategies for the maintenance and rehabilitation using trenchless technologies. This course is designed for those involved in the operation and management of wastewater and stormwater pipelines.

Presented by **ING. SMITH RANGEL**

M. Eng., NASSCO Certified PACP™,
BAMI-I Director of Board and Consultant.

Smith Rangel, M.Eng., is a Civil Engineer with a Master’s degree in Engineering - Project Management (MEPM) from the University of Maryland, College Park, USA. She managed projects in Baltimore County and has led trenchless technology asset rehabilitation projects valued at over \$100 million. As an instructor for the North American Association of Sewer Service Companies (NASSCO - Certified Trainer in PACP™|MACP™|LACP™, she has trained professionals across several Latin American countries, including Colombia, Panama, Uruguay, Brazil, Chile, Ecuador, Venezuela, Peru, Argentina, and Costa Rica. She serves as a member of the Board of Directors of the Buried Asset Management Institute - International (BAMI-I) and is also an instructor for its Asset Management Certification Program. Currently, she works as an independent trenchless technology consultant and as an adjunct professor in the Civil Engineering graduate programs at Pontificia Universidad Javeriana in Bogotá.

Aug. 21ST, 1-3 pm (2 hours)

SPECIAL ACCREDITED WATER COURSES (ESPAÑOL)

Ago. 20TH, 10 am-12 pm (2 horas)

“INTELIGENCIA ARTIFICIAL PARA EL MANEJO DE LA INFRAESTRUCTURA DE ALCANTARILLADO Y TORMENTA.”

(0.2 CEUs / 2.0 PDHs créditos)

Presentado por

LETICIA EBERLY

President/CEO,
WICKED Product
Suite/ LMEC LLC. (FL)

Introducción a la Inteligencia Artificial, donde comenzar, como aplicar Mejores Prácticas y seleccionar la mejor solución para mis necesidades y casos de aplicación.

Como utilizar Inteligencia Artificial para mejorar productividad y para la toma de decisiones. Utilizar la tecnología de Inteligencia Artificial para controlar la calidad de los datos, como herramienta de entrenamiento y como ayuda en la decisión de reparaciones y otras soluciones para preparar presupuestos y otras tareas de gerencia.

Ingeniera de Software con más de 25 años de experiencia en desarrollo de software y rediseño de procesos, y 15 años en la industria de alcantarillado y aguas pluviales. Licenciada en Ingeniería de Software y con posgrado en proceso y Reingeniería de Gestión de Proyectos.

Ago. 21st, 8 am-12 pm (4 horas)

“ESTRATEGIAS PARA LA GESTIÓN DE ACTIVOS DE REDES DE ALCANTARILLADO.”

(0.4 CEU's & Incluye Certificado de Participación avalado por The University of Texas at Arlington - UTA.)

Para asegurar el buen estado de las redes de alcantarillado, es necesario migrar hacia un enfoque de gestión de activos, en el cual la responsabilidad de su mantenimiento y desempeño sea una prioridad. Esta capacitación explora las técnicas estándar establecidas para la recolección de información en redes de alcantarillado, su integración estratégica de activos y su uso para la toma de decisiones en la gestión de mantenimiento y rehabilitación de redes con tecnologías sin zanja. El curso está dirigido a quienes trabajen en la operación y mantenimiento de redes de tuberías en el sector del alcantarillado pluvial y sanitario.

Presentado por **ING. SMITH RANGEL**

M. Eng., NASSCO Certified PACP™,
BAMI-I Director of Board and Consultant.

Ing. Smith Rangel, M.Eng., Ingeniera Civil con Magister en Ingeniería en Gerencia de Proyectos (MEPM) de la Universidad de Maryland, College Park, EE.UU. Gerenció proyectos en el condado de Baltimore, USA y ha liderado proyectos de rehabilitación de redes con tecnologías sin zanja por más de 100 millones de dólares. Como Instructora Certificada de la Asociación Norteamericana de Compañías de Servicios de Alcantarillado (NASSCO en PACP™)[MACP™][LACP™], ha capacitado a profesionales para varios países Latinoamericanos entre los cuales están Colombia, Panamá, Uruguay, Brasil, Chile, Ecuador, Venezuela, Perú, Argentina y Costa Rica. Es miembro de la Junta Directiva del Instituto Internacional de Gestión de Activos Subterráneos (BAMI-I) e instructora del mismo para el curso de Certificación en Gestión de Activos. Actualmente se desempeña como consultora independiente en tecnologías sin zanja y docente en los programas de posgrados en Ingeniería Civil de la Pontificia Universidad Javeriana de Bogotá.

PUT THE NOISE BEHIND YOU

B6 B10 B12 B15

Collect any waste your facility can produce, from light dry material to heavy wet sludges. Hi-Vac's industrial vacs operate for decades in the harshest conditions with minimal maintenance. Connect them to Hi-Vac's custom designed and built manifold systems and extend that capability from a single point across your entire operation.

Aquatech® combination Jet/Vacs are a product of Hi-Vac® Corporation
